#### **DETAILED ACTION**

#### Election/Restrictions

Applicant's election of Group I in the reply filed on 3 January 2007 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 8-9 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim.

#### Status of Action

Claims 2-7 and 10 are examined.

#### Claim Objections

Claims 4-7 are objected to as being dependent from a rejected claim.

# Claim Rejections - 35 USC § 112 2<sup>nd</sup> Paragraph

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 recites the limitation "COMPOUND I" in second sentence. There is insufficient antecedent basis for this limitation in the claim.

### Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 2 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tanabe et al. Increased expression of PDGF receptor beta gene in MCT-induced pulmonary hypertensive rats. Japanese Journal of Pharmacology, Vol. 79 (1999) cited by Applicant on IDS filed 22 June 2006 in view of Topaly et al. Synergistic activity of the new ABL-specific tyrosine kinase inhibitor STI571 and chemotherapeutic drugs on BCR-ABL-positive chronic myelogenous leukemia cells. Leukemia (2001), 342-347.

Tanabe et al. teach that tyrosine kinase inhibition leads to lower PDGFR-beta expression which plays a significant roll in pulmonary hypertensive diseases. That claim 2 is directed to both primary and secondary hypertension (those for which there is a knowe etiological agent and which there is none) includes the plurality of diseases contemplated by Tanabe et al. Tanabe et al. do not specifically recite the claimed active tyrosine kinase.

Topaly et al. teach that STI 571 is a tyrosine kinase.

One of ordinary skill in the art would have been motivated to combine the above references and as combined teach the claimed invention as claimed. One of ordinary skill in the art would have been motivated to combine the above reference because both

Art Unit: 1614

are directed to tyrosine kinases and to that extent, the tyrosine kinase of Topaly et al. would be obvious to use in the methods taught in Tanabe et al. Thus, the combined references teach and make prima facie obvious how to use the claimed invention at the time that it was made.

#### Conclusion

No claim is allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michel Graffeo whose telephone number is 571-272-8505. The examiner can normally be reached on 9am to 5:30pm Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ardin Marschel can be reached on 571-272-0718. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
